

# CHILE

ARTICLE 4 DEADLINE: 1 JUNE 2021 (NOT ON TARGET TO MEET DEADLINE)

PROGRAMME PERFORMANCE	2015	2014
Problem understood	6	7
Target date for completion of cluster munition clearance	1	2
Targeted clearance	0	2
Efficient clearance	0	2
National funding of programme	7	7
Timely clearance	0	0
Land-release system in place	7	7
National mine action standards	7	7
Reporting on progress	2	5
Improving performance	2	2
<b>PERFORMANCE SCORE: VERY POOR</b>	<b>3.2</b>	<b>4.1</b>

## PERFORMANCE COMMENTARY

Chile has failed to initiate survey and clearance of contaminated areas, despite being a state party since 2011. This is a violation of the duty under Article 4 of the Convention on Cluster Munitions (CCM) to clear cluster munition remnants (CMR) "as soon as possible". It has also not submitted an Article 7 report since 2013. This is also a violation of the CCM.

## RECOMMENDATION FOR ACTION

- Chile should submit an Article 7 report and, more importantly, begin survey and clearance of CMR-contaminated areas as soon as possible.

## CONTAMINATION

Chile has reported almost 97km<sup>2</sup> of CMR-contaminated area in three of its 15 regions (see Table 1). Contamination is the consequence of deployment of cluster munitions on military training ranges. Since the reported extent represents the total size of the areas where cluster munitions were used,<sup>1</sup> the actual extent of contamination may be significantly smaller.

The impact of CMR contamination is believed to be minimal, and there have been no reports of any casualties.

## Other ERW and Landmines

Chile is also affected, to a limited extent, by other unexploded ordnance (UXO), and has some 13km<sup>2</sup> of mined areas to release.

Table 1: **CMR contamination as at June 2015**<sup>2</sup>

Province	CHAs	Area (km <sup>2</sup> )	Submunitions expected
Arica and Parinacota	1	33.71	608
Tarapacá	2	56.65	20
Magallanes and Antártica Chilena	1	6.52	20
<b>Totals</b>	<b>4</b>	<b>96.88</b>	<b>648</b>

CHAs = Confirmed hazardous areas

## PROGRAMME MANAGEMENT

The national mine action programme is managed by the National Demining Commission (Comisión Nacional de Desminado, CNAD), which is chaired by the Minister of Defence.

Chile has not reported on any steps taken to elaborate a workplan to address its four contaminated areas.

## ARTICLE 4 COMPLIANCE

Under Article 4 of the CCM, Chile is required to destroy all CMR in areas under its jurisdiction or control as soon as possible, but not later than 1 June 2021. Its inaction means that it is not currently on target to meet its deadline.

Indeed, as reported in last year's Mine Action Review, Chile should already have completed requisite survey and be conducting full clearance of hazardous areas. Its failure to do so is a violation of the Convention.

## LAND RELEASE

As at the end of May 2016, Chile had not reported conducting any survey or clearance of its four CMR-contaminated areas.
